- 54) 1 x Magnifying glass (x 10)
- 55) Step-by-step instructions in making a good quality cliche

^{*} This special package price already takes into account the discount offered on multiple purchases, which equates to £200.00 (US\$ 350.00).

^{**} CPL-CM plate making system works on 220/240v only. However, for 110v (North America), we would recommend our CPL-CM2 system which is available in 110v but costs an additional US\$ 350.00. The benefits of the CPL-CM2 is that it has a larger exposure area, but more importantly, the timer is digital as opposed to analogue. For UK and other European customers, the CPL-CM2 costs an additional £200.00 to the above package price (Available in 220/240v also).

Package Number 2 offers you the opportunity to cover a wider sector of the promotional products market by being able to print onto flat and non-flat products such as golf balls, round pens etc.
